

Creating a Hot Spot Question

Creating a Hot Spot Question

This guide will demonstrate how to create a Hot Spot question in Blackboard. In a Hot Spot question, students are instructed to click on a specific part of an image to receive credit.

Selecting a Question Type

With the Test Canvas open, Click on **Create Question** and select **Hot Spot** from the menu.

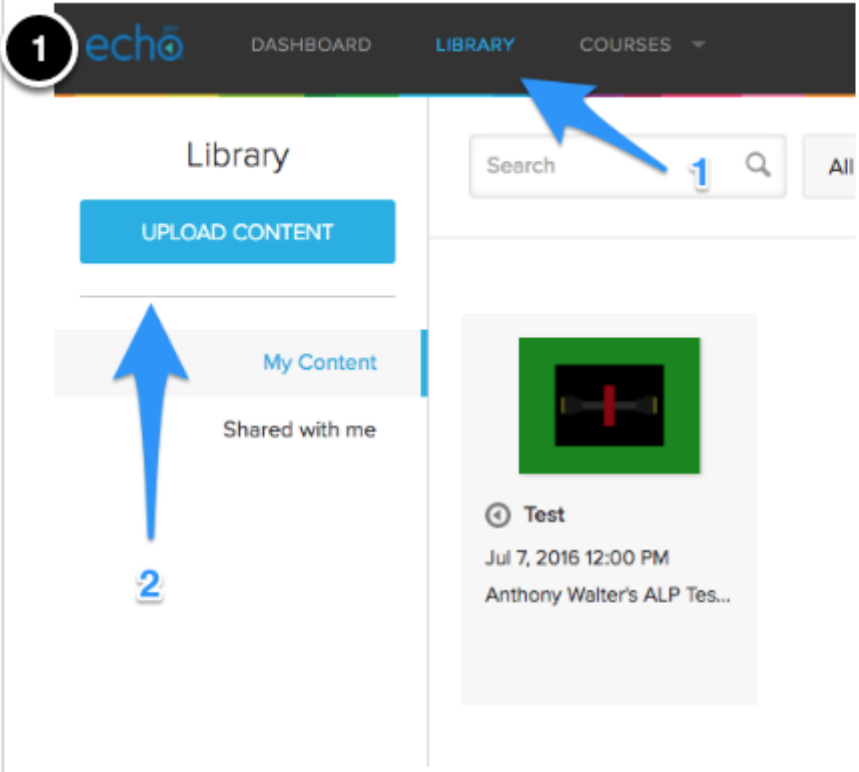

Entering Answer Information

Create/Edit Hot Spot Question

Hot Spot questions are based on students identifying an area in an image file. The area is set by pixel coordinates and if students are not using the inline points fields for each question on the canvas. [More Help](#)

ANSWERS

Click and drag the mouse over an area in the image to specify the hot spot area for the correct answer. Start with **Clear** to remove the rectangle and start again.

Top Left Coordinates

Bottom Right Coordinates

Clear

To specify the answer region:

1. Click and drag your mouse cursor over the portion of the image you wish to mark to accept as correct.
2. **Coordinates:** The coordinates of the area selected will populate here.
3. Click the **Clear** button to reset the coordinate information if you make a mistake.

Setting Up Feedback and Category Information

FEEDBACK

Enter feedback that will display in response to a correct answer and an incorrect answer. If partial credit is allowed, answers that are partially correct will receive the feedback for an incorrect answer.

Correct Response Feedback
For the toolbar, press ALT+F10 (PC) or ALT+FN+F10 (Mac).

7. Hot Spot: click on Library

Success: Question created.

Question: click on Library

Answer:

The screenshot shows the Echo360 interface. At the top, a purple notification bar says "Success: Question created." Below it, the "Question" field contains the text "click on Library". The "Answer" field shows a preview of the Library page. In the preview, a blue arrow labeled "2" points to the "My Content" tab. A black callout box with a red arrow points to the "Points: 10" value in the top right corner, with the text "Click here to update the point value".

The question you created will now appear on the test canvas. Click the **Points** value to change the number of points.
