Inspiring excellence. Transforming lives.

Overview:

- Understanding Academic Advising**
- Things peer advisors should know**
- Building meaningful relationships**
- Making the most of technology**
- Growing as a peer advisor**

Components of Academic Advising

Conceptual

Informational

Relational

Technology

Personal

Understanding the Concept of Advising

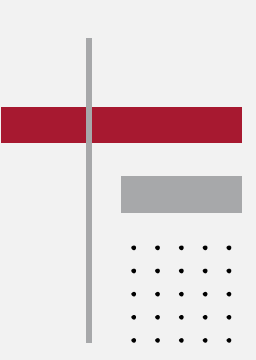

Learning Outcomes:

1. Academic Advising as a concept
2. The student journey map
3. Know the advising cycle
4. How to implement the advising cycle into their practice
5. Know the UFS advising network
6. Roles and responsibilities of peer advisors
7. Roles and responsibilities of students

WHAT IS ACADEMIC ADVISING?

- Helping a student with module codes at registration
- Teaching a student how to be successful at university
- Giving advice on what degree to study
- Teaching students the rules and regulations at the university

Academic advising is a “way to **connect** students to the campus and help them feel that someone is looking out for them”.

– George Kuh (2005)

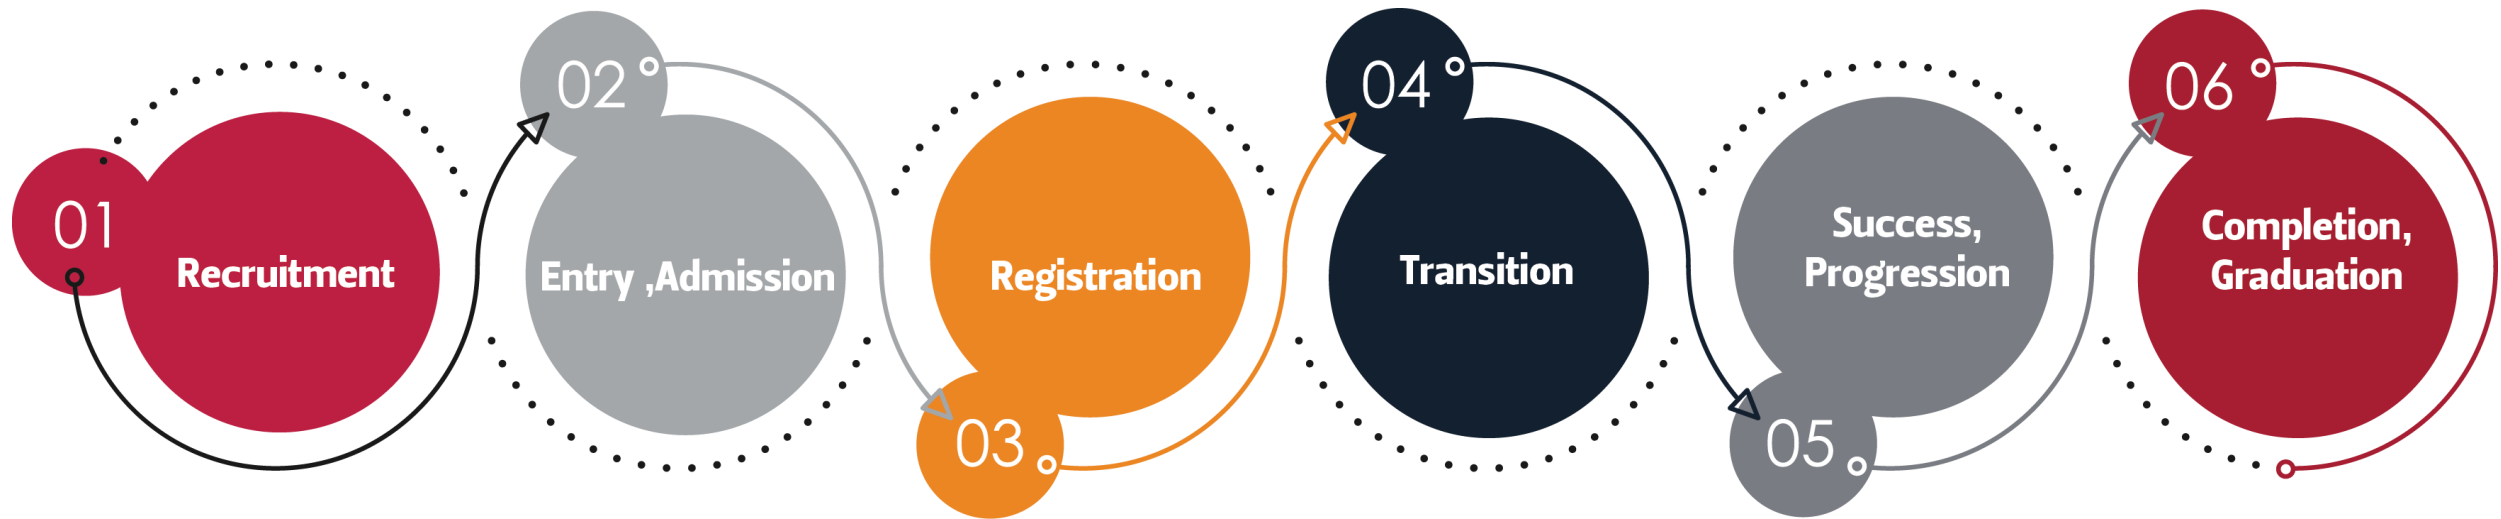

UFS Academic Advising definition

Academic Advising at the UFS is an ongoing and intentional teaching and learning process to support and encourage advisees in aligning and fulfilling their personal, academic and career goals. It is high-impact practice directed at connecting, empowering and supporting students to achieve academic success.

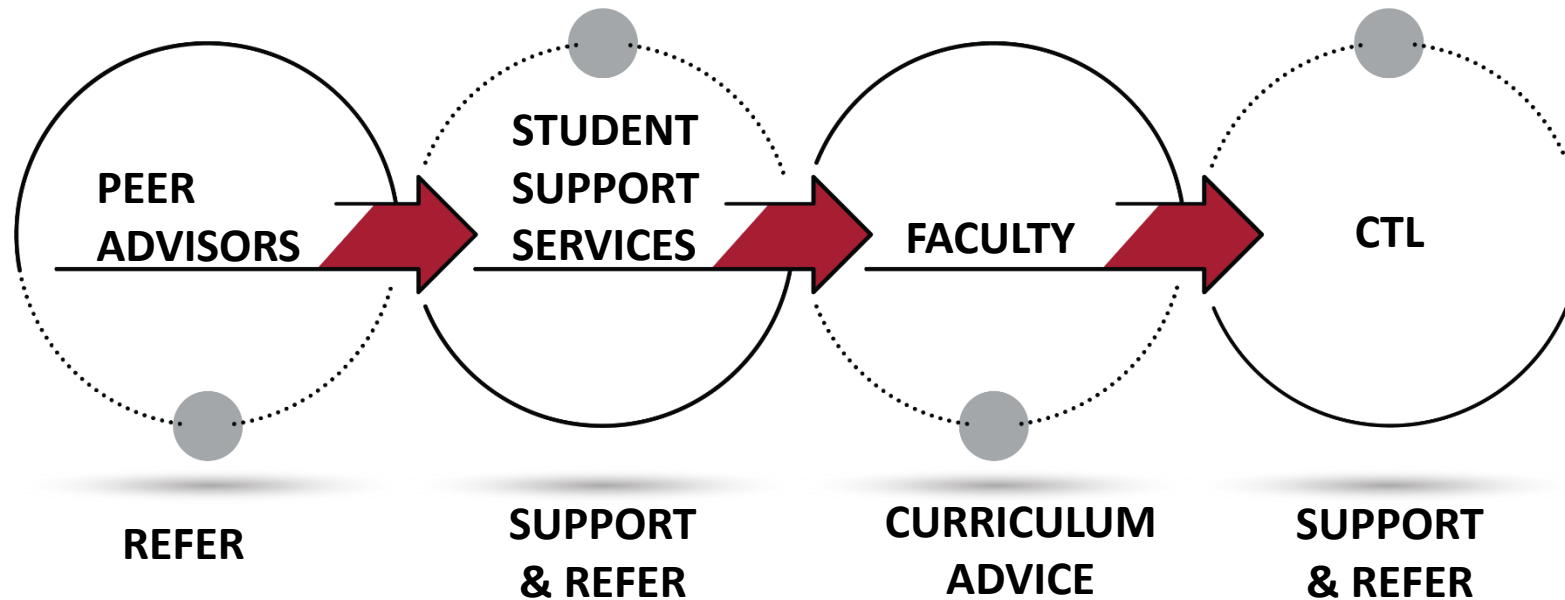

As a shared responsibility between central advisors, faculty advisors and advisee, advising aims to maximize students potential by facilitating a conceptual understanding, sharing relevant information and developing a relationship focused on promoting academic success.

The envisaged result is that students have a meaningful academic experience while at the UFS and feel a sense of belonging to the UFS.

Why Advising Matters...

ACADEMIC ADVISOR CATEGORIES RESPONSIBILITIES

Why focus on student engagement evidence ...

- Facilitates a move away from anecdote to a culture evidence.
- Is essential to improving student learning and responding to accountability expectations. *(Hutchings, Kinzie & Kuh, 2014)*
- Promotes a more nuanced understanding of what different students experience in a specific institutional context.
- Helps develop more equitable environments in which the majority of students have a greater chance of success.

Academic Advisors help students:

- To be **successful** in their studies by helping them gain insight or **direction** of their **personal, academic** and **career goals**
- Understand options, determine **resources** and, when necessary, identify alternatives

ACADEMIC ADVISING CYCLE

Quarter 1

- Understanding Academic Advising and Adoption of Academic Advising institutional culture
- Exploration of academic and career advice
- Setting and Alignment of personal, academic and career goals
- Educational plan
- Registration/ Enrolment
- Connection to the institution support network
- Integration into the institution

Quarter 4

- Exam preparation
- Module selection for the next year and credit check
- Reflection (i.e. my pathways)
- Life plan- What lies ahead
- Career advice and Development

Quarter 2

- Motivation
- Campus awareness
- Understanding rules + regulations (credit load, progression, pre-requisites, qualifying for exams)
- Application for selection programmes and campus transfer application
- My success tracking (i.e. time management, study skills, credit load, financial management)
- Exam Preparation

Quarter 3

- Reflection on the first semester
- 2nd semester registration and motivation
- Career planning – review and re-alignment
- Leadership development
- Planning for success (i.e. exam preparation, application for financial assistance)

What students learn through academic advising

- ❑ Important **academic concepts** & terminology;
- ❑ University & **Faculty Rules & Procedures**;
- ❑ **Student habits** related to academic success; &
- ❑ How to connect with university **support services**.

Benefits of Peer Advising

Tutor roles and responsibilities

- To support your students
- To stay in contact with the academic advisors at CTL
- To refer students in need of support
- To treat students with respect and keep confidentiality
- To know the student support services on campus

Tutor responsibility

- Assist students in applying & discussing content related to the module, as delivered in the class;
- Ensure students are awarded the opportunity to work on difficult concepts with their classmates, while improving their study strategies
- To allow students to reflect on, revise and dissect the material presented in class from a peer's perspective
- To offer a community of student learning lead by peers

Peer advisor responsibilities

- To support your students
- To stay in contact with academic advisors at CTL
- To refer student in need of support
- To treat students with respect
- To know the Student Support services on campus

CTL Academic Advisor

- Assist students with academic pathway planning (Educational planning)
- Credit count check
- Learning/study strategies
- Time management & Goal setting
- Revision planning
- Exam preparation
- University transition/navigation

Things Peer Advisors should know

Learning Outcomes:

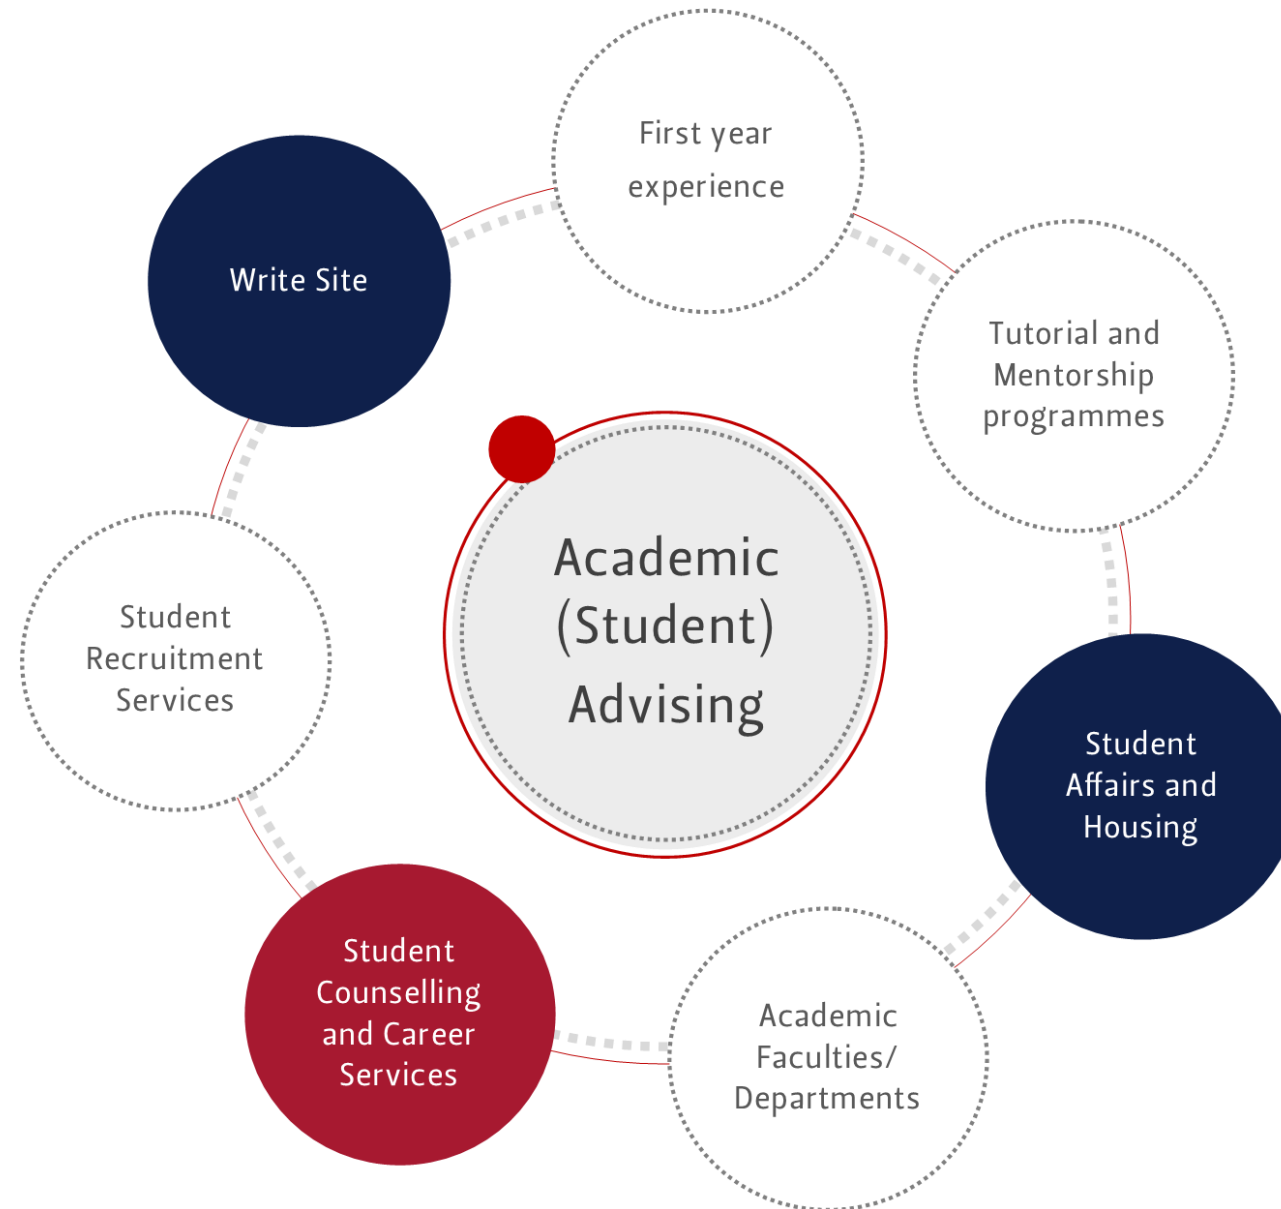

1. Identify information peer advisors should know
2. Know what information peer advisors should disseminate to students
3. Where to allocate university policies and procedures
4. Where to allocate the university calendar
5. University resources and support services
6. Knowledge about student populations

What you need to know:

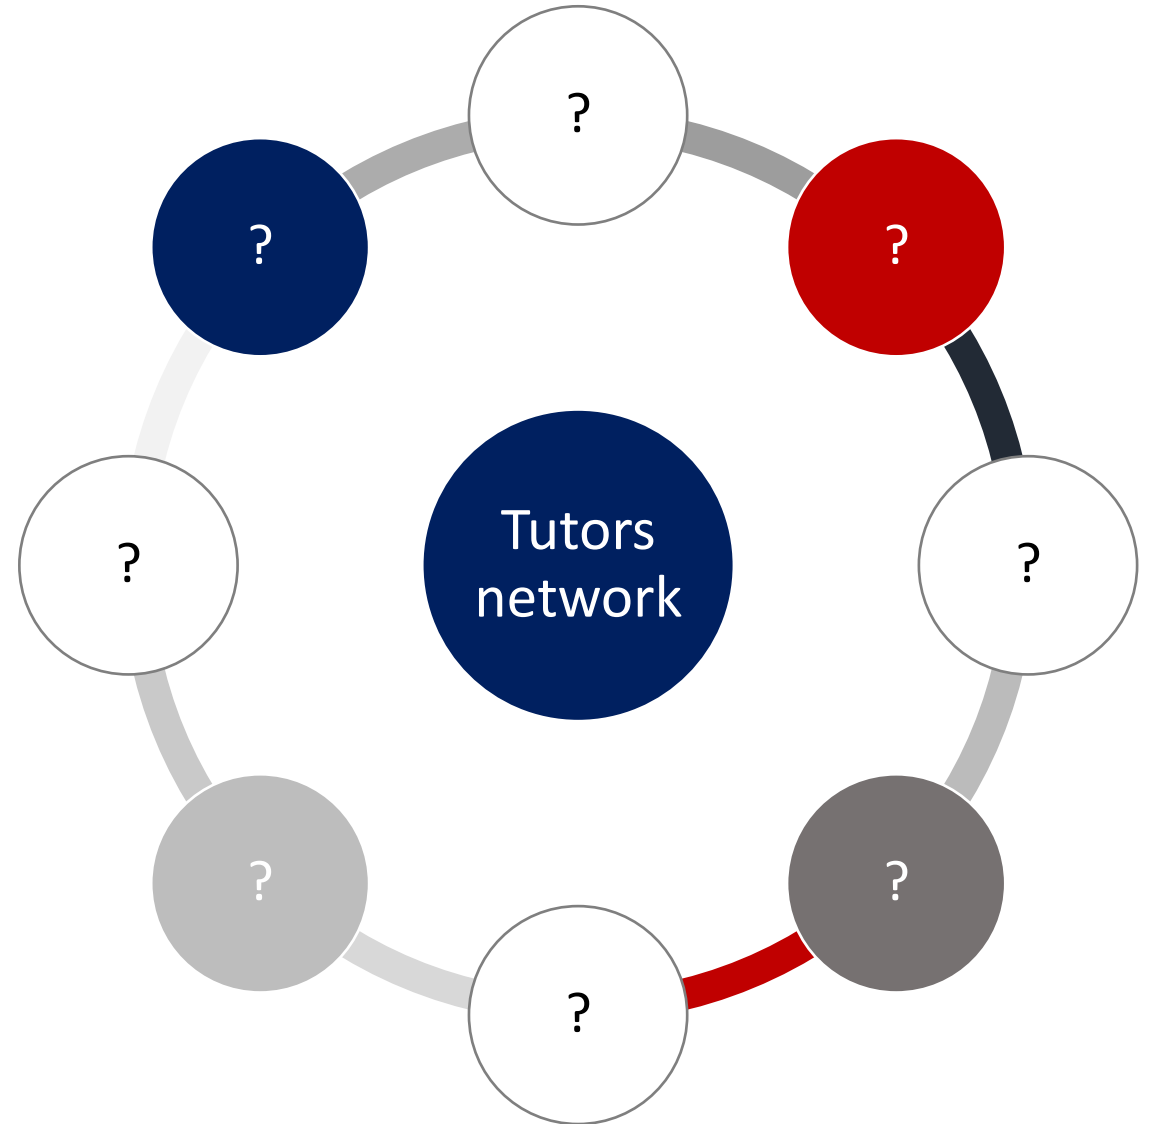

- Student Success Resources (Support Network & Student Success Portal)
- UFS Calendar
- University policies and procedures – Where to find
- Academic programme information
- Faculty Specific Resources (Advisors/ Who is who; Faculty structure/departments; & Associations)

The Academic Advising network

Activity: Your advising network

In your respective groups, identify the relevant student support services that can help you best support your students.

General Rules

PROGRESSION RULES TO REMEMBER

- Rule A3.10: Progression rule for undergraduate students except extended programme
- Rule A3.11: Readmission to modules & progression rules for extended programmes
- A5 Duration of study
- Rule A8: Credit Transfer

ASSESSMENT RULES

- Rule A9.2: Modules mark
- Rule A9.4: Pass Requirement
- Rule A9.10: Additional time during assessments
- Rule A10: Qualification with distinction

4 – 7 May 2021

➤ **#SuccessSeries (Dates TBC)**

live student dialogues, podcasts,
posters, videos, etc.

➤ **Q and A sessions**

every last Friday of the month

Understanding the student population

- All students who come for academic advising are unique and deserve the best possible advising services. It is essential that advisors are competent in building relationships with diverse student populations and that advisors make a conscious effort to educate themselves about the characteristics and needs of unique student groups.
- A few unique student groups include **commuter students**, **students with disabilities** and **mental health disorders**, **first-generation** students and **athletes**.

Understanding the student context

The most noteworthy findings arising from this report include:

- The majority of the student respondents (92%) own at least one internet-capable device.
- More than 70% of respondents are able to access the internet off-campus by purchasing data from a service provider.
- A total of 13% of respondents indicated that they have no access to the internet off-campus.
- The qualitative analysis on respondents' open-ended comments also show that there are limitations to how and when students will be able to access the internet.

STUDENT REALITY

Students will not always have access to computers and networks

UFS research has shown that students rely heavily (80% of the time) on computer labs to complete online activities.

Work Overload - Remember your module is not the only module students should complete.

The majority of students indicated that they struggle with access to networks off campus.

Some of our rural students would need to travel to a place where there is network to access materials.

Device ownership is not uniform, the majority of students have access to a smartphone, and some students have access to a computer, this needs to be taken into consideration when designing learning material.

Building meaningful Relationships

Learning Outcomes:

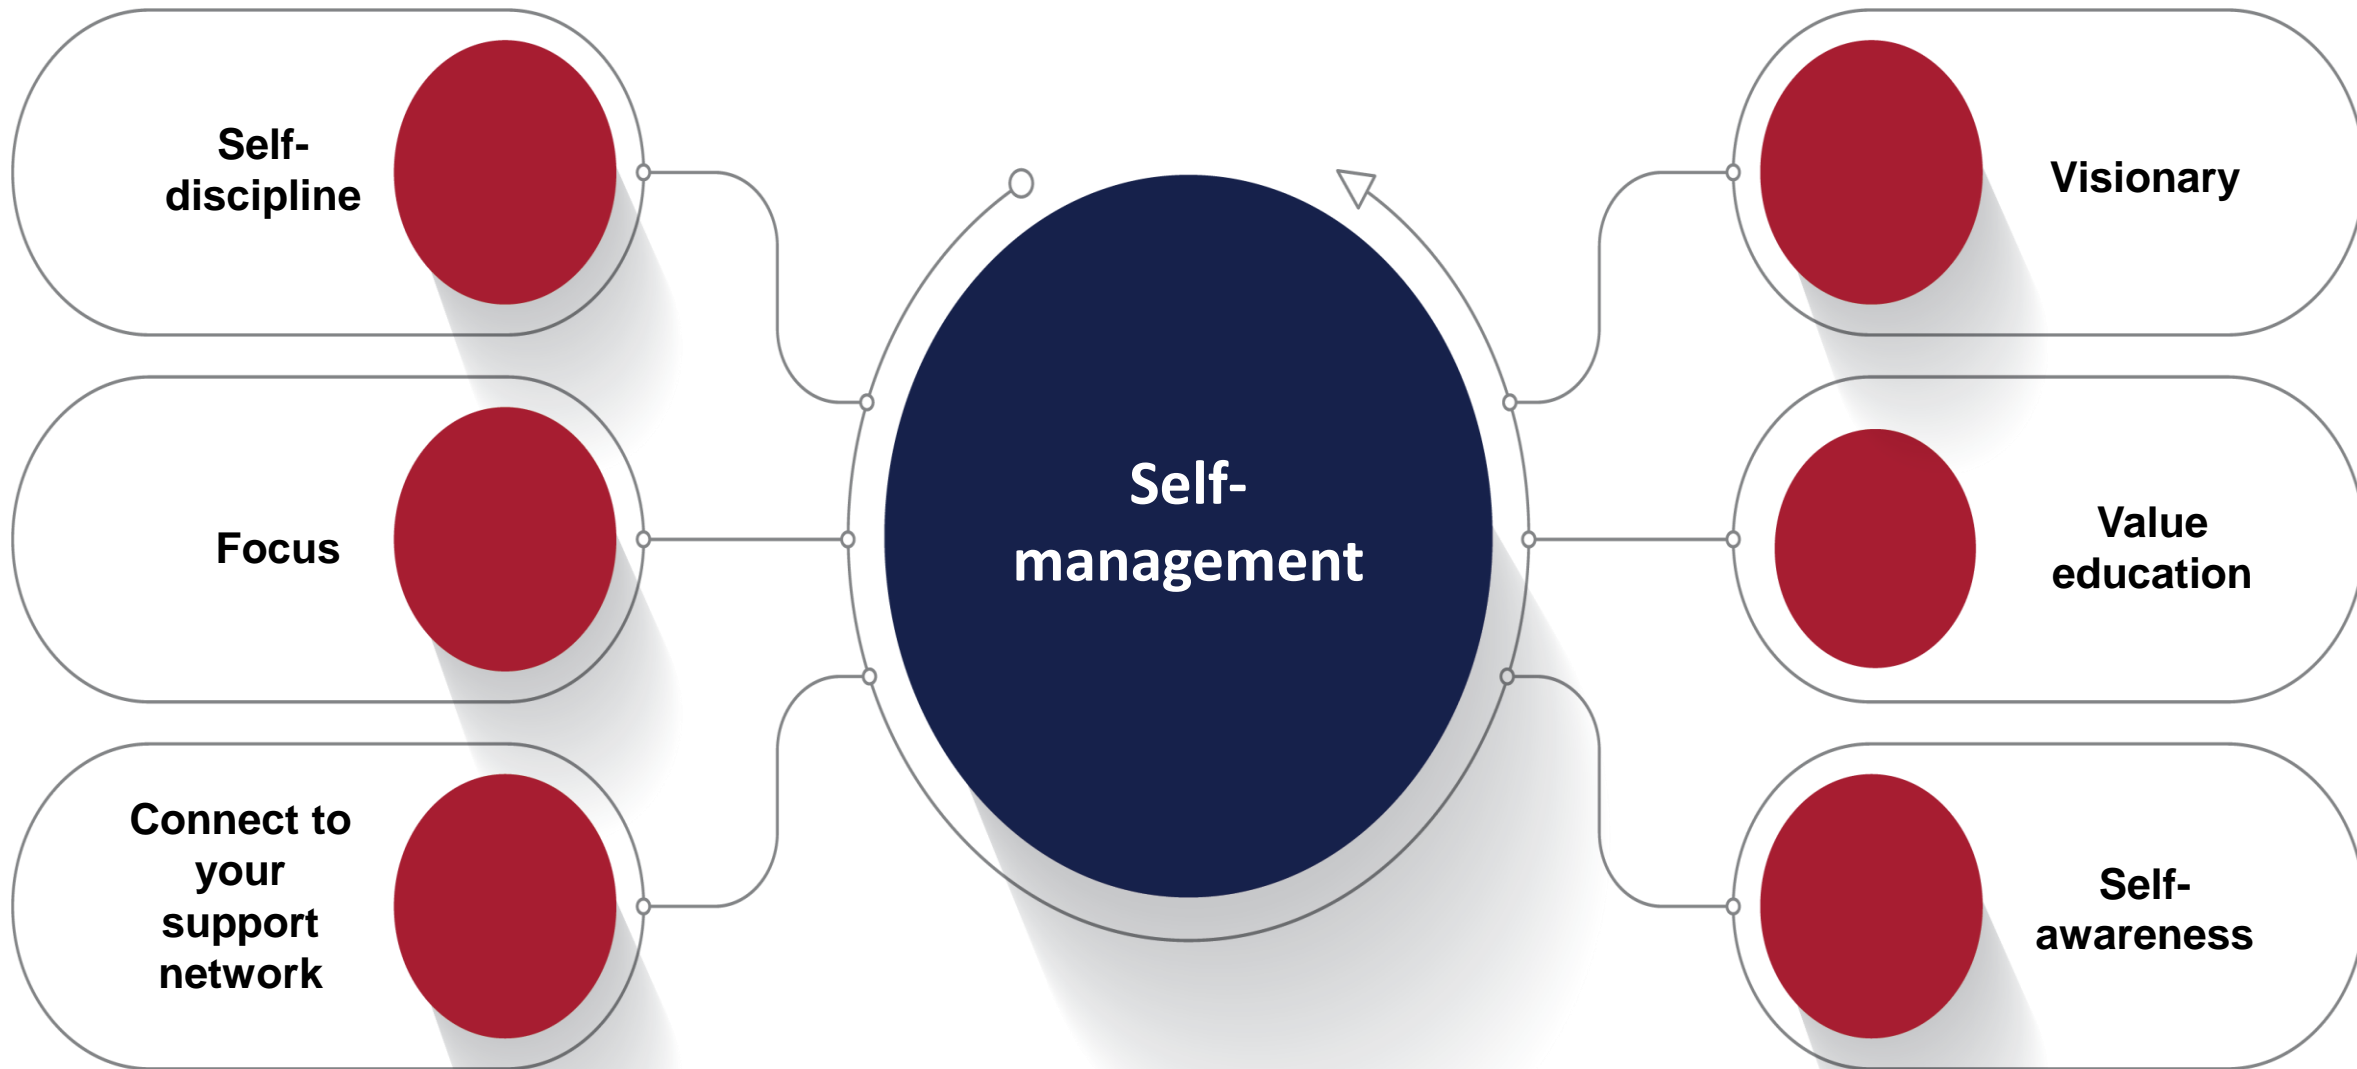

1. Apply self-management
2. Build a Relationship of trust with students
3. How to handle difficult student situations
4. Apply Active listening when dealing with students
5. Know how to refer a student in need of support

Applying Self-Management in my own life

- Set your own goals
- Focus your behaviour to support your goals
- Build meaning relationships
- Find a support network for yourself
- Reflect and learn from your mistakes
- Set new goals

“Self management is about preparing for the future, owning your present and taking care in what you do – as well as learning how you could do better next time.”

**The Advising relationship
is a relationship of
mutual trust and respect**

How to handle difficult situations

What kind of difficult situations can you encounter as a tutor?

Tips to deal with difficult situations:

--	--

--

Building Rapport

- Rapport is a process of establishing a relationship of **trust, harmony, affinity or accord** with another; it is the foundation of success.
- Building rapport is a process that takes place **throughout the beginning** of the coaching process.
- When you have rapport with someone, you are **better placed to influence, learn, and teach** as your students are more likely to accept your ideas, share information, and are open to create opportunities together.
- Sometimes rapport happens naturally, but it can also be built by **finding common ground, developing a bond and being empathic.**

Rapport building skills

- Listening actively
- Empathy
- Paraphrasing
- Reflecting feelings
- Genuineness
- Unconditional Positive Regards
- Open Questions
- Appropriate Self-disclosure

Activity

Active Listening

Let's see if you can listen actively.
Try to draw the diagram described
by the facilitator.

Watch this video: <https://www.youtube.com/watch?v=rzsVh8YwZEQ>

What is student referral?

Referral
decision

Determine
whether a
referral should
be made

Referral
process

Professionally refer
the student to the
proper person or
agency for help

Follow
up

Evaluate the
appropriateness
and effectiveness
of the referral

Tips on making effective referrals

1. Equip yourself with campus **information**
2. **Have a list** of departments, names and contact details of offices your will be referring
3. **Pay careful attention** to the student
4. **Ask for help** to ensure accurate referral
5. Make the student **comfortable** with the idea of being referred (highlight how helpful a particular office is)
6. Keep the chain of referral **as simple as possible**

Tips on making effective referrals (cont...)

7. Help students with setting an appointment (If possible to encourage student to see the appointment through)
8. Jot down what type of referrals you have made
9. Every so often check your referral notes (success coaches meeting)

Referring to the advising network

Case Study 1

Thabo is one of the students that regularly attends your tutorial sessions and is always on time. You have realised that he seems to be having difficulty understanding content of his module and always fails to complete his activities, and as a result never participates in group discussions. His failure of this module is beginning to affect his confidence. Thabo asks for your help during after the tutorial.

Where would you refer Thabo?

Case Study 2

Khethiwe comes to you in tears. Things have not been going well. She is unhappy with the course she is registered for and is afraid she is going to lose her funding if she changes the programme. She is already struggling to get through the month with most days not having enough money to buy food. What would you do in this situation.

- Help her with a little food and sit with her to find alternative funding
- Refer her to No Student Hungry
- Refer her to CTL
- Refer her to the Financial Aid office or Tuition Fees

Case Study 3

Anna is a first-year student who has come for a tutorial session. She seems distressed. During a session she shares with you that she does not seem to understand what is required of her to pass her first-year, and she feels like everything is just too much for her to take in, in terms of tests and assignments' deadlines. She cries telling you that she does not think she would be able to measure up to her programme.

Where would you refer Anna?

Case Study 4

Wendy is an incoming Social Work student from an under-resourced school. Wendy wants to study Social Work because she enjoys helping people. However, she does not really know what a career in social work entails.

Her parents cannot pay her tuition fees fully, and Wendy needs to work part time to help support herself.

However, she is not yet sure whether she will have enough time to study Social Work and find a part-time job, and she has no idea how her timetable works. She also has some classes that are clashing

How would you help Wendy?

Making the most of Technology

Learning Outcomes:

1. Know where to access online advising services and resources
2. Use technology to support their students as peer advisors

Getting comfortable with technology-enhanced learning

“Technology-enhanced learning broadly refers to the use of Information Communication and Technology (ICT) to enhance and support the learning experience of students

-(Gordon, 2014).”

Activity

Class Discussion

How can you use technology to support your students as a tutor?

How to maximise BB Collaborate to support your students

- Plan the resources you will share every week.
- Have all the links to your resources readily available to share with your students.
- You can use the “whiteboard option” if you prefer writing as a method of teaching/explaining concepts to your students.
- Use polls for activities to keep your students engaged and ask them questions regarding the content.

Netiquette

Netiquette may be viewed as the 'house rules' shared by a group. Students can contribute to these 'rules of engagement' as part of an introductory online collaborative activity that will aid group cohesion (and ownership of the rules) for further online activities.

Because non-verbal cues are absent with asynchronous interactive tools, messages may easily be misinterpreted and therefore keeping with netiquette guidelines can help promote civil dialogue and engagement

(Pappas 2016. Netiquette tips for online discussions)

<http://elearningindustry.com/10-netiquette-tips-online-discussions>

Netiquette...Tips for online discussions

- Do not dominate the discussion. Give your students the opportunity to join in the discussion (especially during collaborate and Q&A sessions).
- Popular emoticons such as 😊 can be helpful to convey your tone, but be cautious not to overdo or overuse.
- Think and edit before you push the “Send” button. Use correct spelling and grammar.
- When in doubt, always ask for clarification from your coordinator or lecturers. Do not hesitate to let your students know you will get back to them with more informed responses/feedback.
- Never criticise your student’s ability to read or write.

Netiquette...Tips for online discussions

- Thank, acknowledge and support your students freely. Acknowledge before differing. Use 'please and thank you'.
- Keep all messages concise not more than a screen full. Attach a document for longer discussion contributions/additional information/resources.
- Present ideas appropriately. For example, do not capitalise all letters since it may suggest shouting.
- The principles are the same as for any conversation but with a little more emphasis on coming to shared understandings.

Growing as a peer advisor

Learning Outcomes:

1. Identify skills, knowledge, and attitudes associated with peer advising
2. Develop a growth mindset as a peer advisor
3. Display cultural competence as a peer advisor (resources provided online)
4. Practice self-care (content presented on online platform)

Activity

Group Exercise

What Tutors should know about advising?

Skills:	Knowledge:	Attitudes:

MINDSETS

FIXED MINDSET

The belief that skills, intellect, and talents are set and unchangeable.

GROWTH MINDSET

The belief that skills, intellect, and talents can be developed through practice and perseverance.

I'll stick to what I know.
Either I'm good at it or not.

DESIRES

I want to learn new things.
I am eager to take risks.

It's fine the way it is.
There is nothing to change.

SKILLS

Is this really my best work?
What else can I improve?

This is a waste of time;
there's a lot to figure out.

EFFORT

I know this will help me
even though it is difficult.

It's easier to give up.
I'm really not smart.

SETBACKS

I'll use another strategy;
my mistakes help me learn.

This work is boring.
No one likes to do it.

FEEDBACK

I recognize my weakness,
and I know what to fix.

It's easy for him or her.
They were born smart.

TALENTED PEERS

I wonder how they did it.
Let me try to figure it out.

Cultural Competence

The aim is to create "...a place where the sacredness of each person is honoured and where diversity is aggressively pursued." — Boyer (1990)

Cultural Awareness

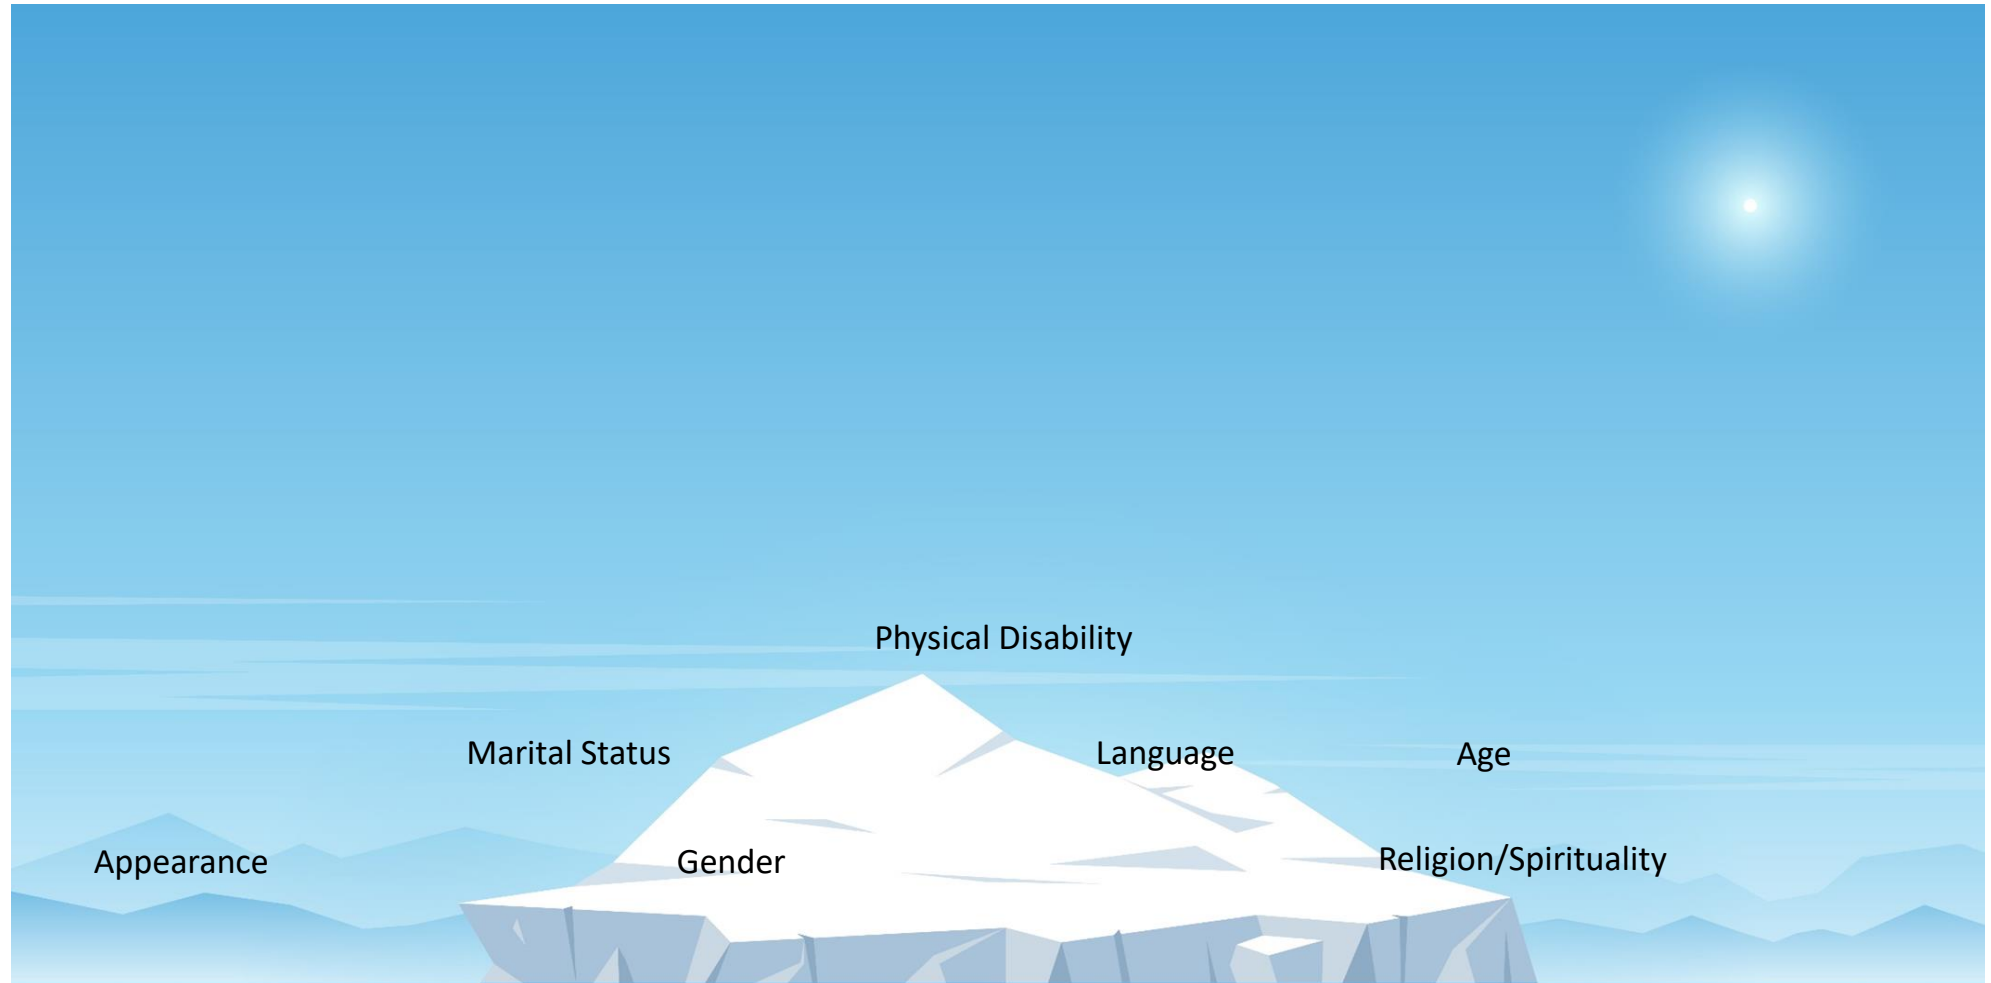

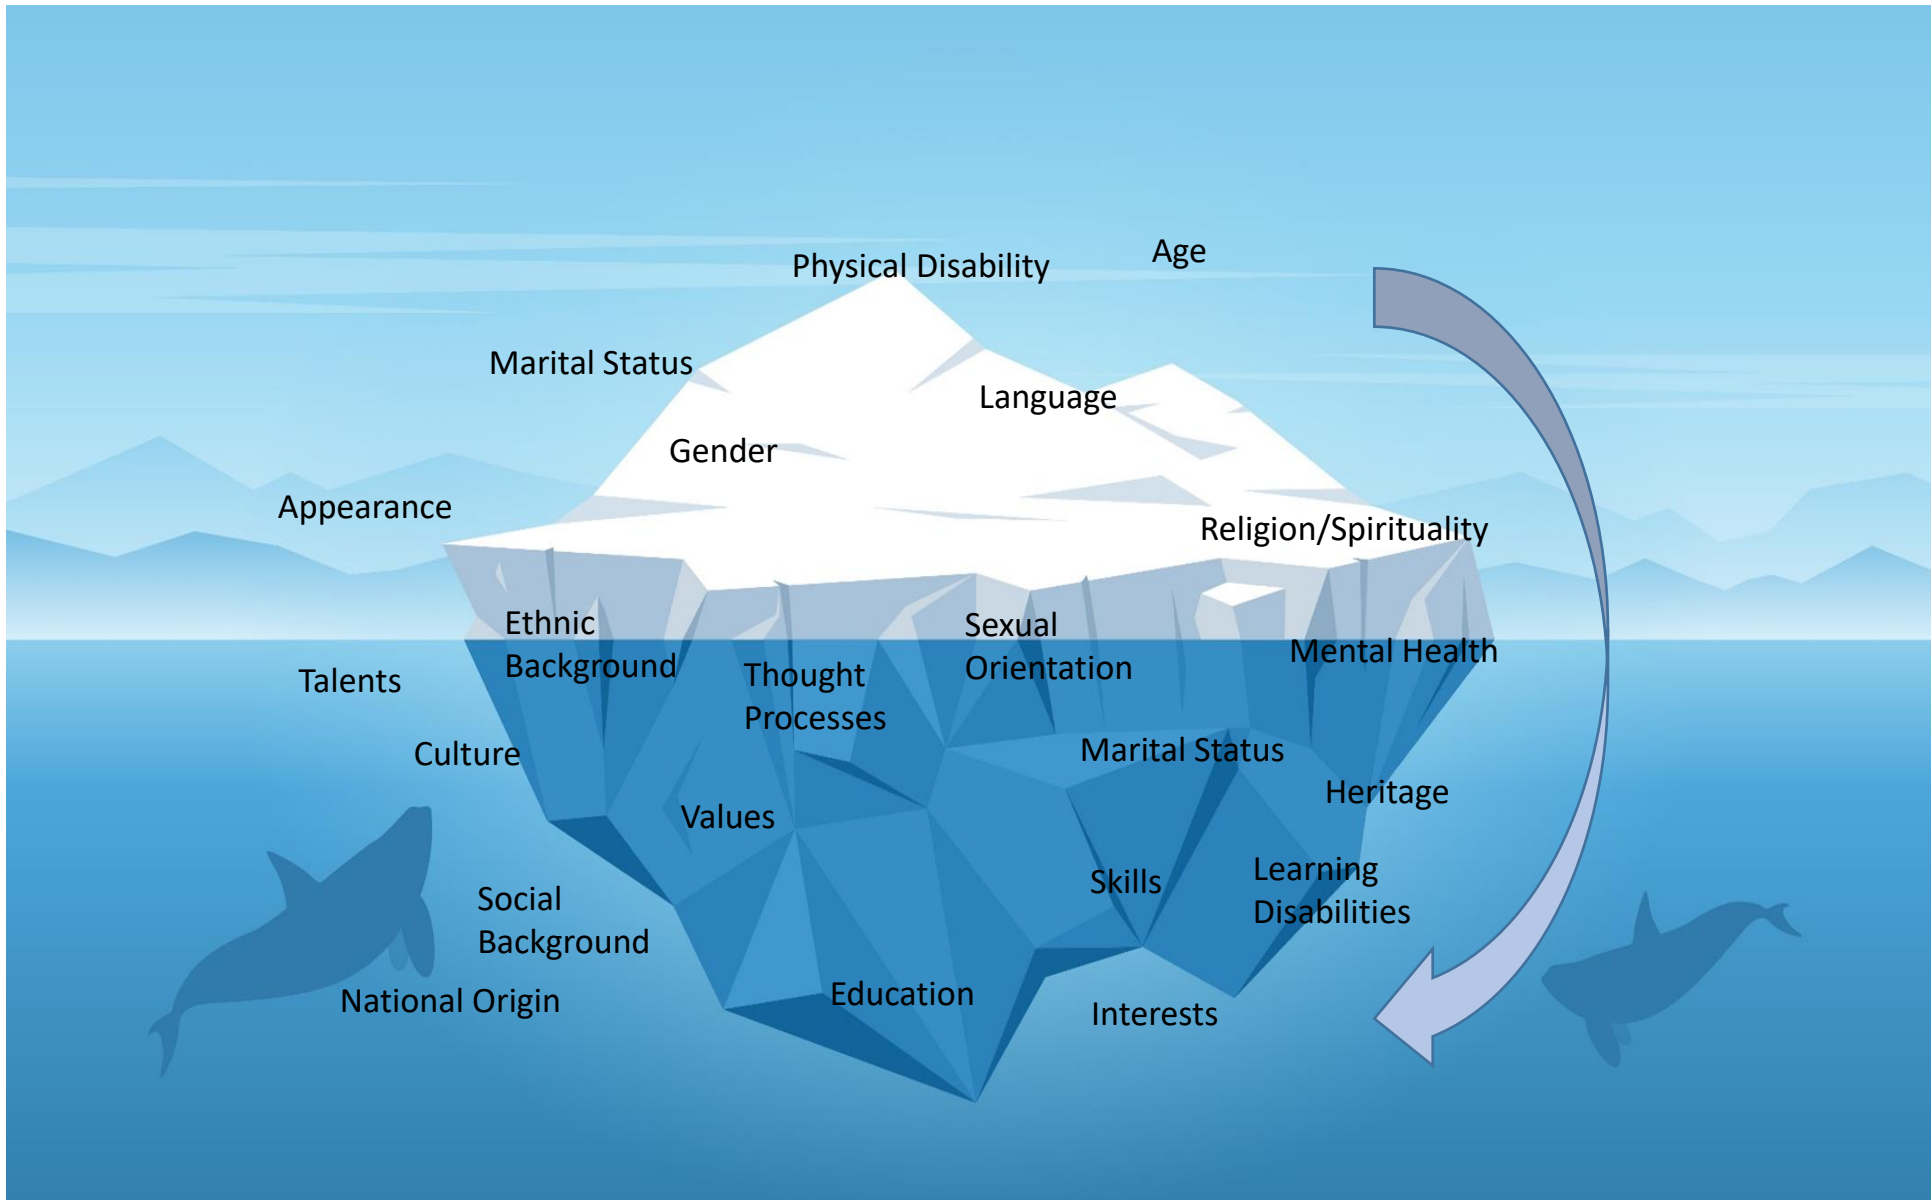

Diversity exercise: Poll

1. Have you ever had your heart broken?
2. Do you believe in Abortion?
3. Have you have failed a module
4. Have you ever visited an academic advisor to help you cope with your studies?
5. Lost a family member

Dimensions of Diversity

Managing stress

Tips to help peer advisors deal with stress

- Engage in physical activity, for example walking or aerobics
- Creative or artistic activity, such as poetry or drawing
- Spend time with friends and seek social support
- Engage in hobbies you enjoy
- Look for practical, realistic ways to solve problems leading to stress
- Relaxation techniques and meditation
- Seek help

Managing stress

- Laugh with others
- Talk to students in your class.
- Take a walk.
- Practise relaxation techniques: deep breathing, visualisation, yoga, stretches.
- Celebrate both big and small happenings with those around you.
- Don't try to carry everyone's burdens.

Managing stress

- Take some time during the day to unwind
- Keep organised.
- Have a realistic perspective of your job and yourself: no one can be everything to everybody.

Follow up Webinars

Skills, knowledge, and attitudes associated with Peer Advisors
- Done after training session

Growth Mindset talk – 20 April 2021
